### ABOUT

Frontend developer with 7+ years of experience in fintech, education, healthcare and transportation.  
Core stack: TypeScript, React and Next.js. Experienced in responsive layouts and state management.

I build user portals, forms and dashboards, integrating APIs, authentication and AI assistants.  
At ZiphyCare, I built and maintained a React Native mobile application.

I optimize data fetching and UI rendering and write automated tests with Vitest, Jest and Playwright.  
I maintain CI/CD pipelines and use Claude Code, Codex and MCP in daily development.

### SKILLS

|                  |                                                                                                           |
|------------------|-----------------------------------------------------------------------------------------------------------|
| Languages        | JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL                                                           |
| Frameworks       | React 19, Next.js, React Native, Redux, Redux-Saga, MobX, Zustand, React Router                           |
| Data & State     | TanStack Query, Chart.js, interactive data visualization, REST API, GraphQL                               |
| Styling          | Tailwind CSS, Styled-Components, Material UI, SASS/SCSS, Responsive Design, Accessibility (WCAG)          |
| Testing          | Vitest, Jest, React Testing Library, Playwright, Cypress, Storybook                                       |
| Tooling          | Vite, Webpack, Babel, Git, Docker, Husky, ESLint, CI/CD                                                   |
| Auth & Real-time | AWS Cognito, Azure Entra ID / MSAL, WebRTC                                                                |
| Backend          | Node.js, Express.js, NestJS, ASP.NET Core (.NET), Python                                                  |
| AI Products      | AI assistant/chatbot integration, multi-turn Q&A, AI-generated analysis, Claude Code, Codex, Copilot, MCP |

### EXPERIENCE

**Frontend Developer** 08/2024 - Present  
**Velvetechn** - global IT engineering and platform consulting Remote

- Built production React 19 and TypeScript applications with Next.js, TanStack Query, Zustand and Tailwind CSS across fintech, education and transportation products.
- Built frontend workflows for an AI education platform that generated student groupings and lesson guides and supported multi-turn follow-up Q&A for teachers.
- Integrated authenticated AI research and support assistants into a fintech dashboard, including Cognito user context, token refresh and third-party widget lifecycle management.
- Developed data-heavy dashboards and optimized rendering and data fetching for large datasets, improving load and interaction times.
- Built automated test coverage with Vitest, Jest, React Testing Library and Playwright; integrated quality gates into CI/CD.
- Used Claude Code, MCP and Codex daily to accelerate delivery while retaining responsibility for architecture, testing and code quality.

**Frontend Developer** 11/2022 - 08/2024  
**ZiphyCare** - healthcare delivery company Remote

- Built and maintained a React Native mobile app; developed patient registration and diagnostics flows in Next.js.
- Integrated secure WebRTC video consultations for remote patient care.
- Implemented Stripe payment integration for secure transactions and a smoother checkout experience.
- Optimized performance for mobile users across core patient-facing flows.
- Built a React, TypeScript and Redux admin panel for order processing, with Jest unit tests.

**Fullstack Developer** 06/2019 - 11/2022  
**Dao Tech** - agro-industrial enterprise management platform Remote

- Built enterprise management workflows and data-quality controls to reduce manual processing and data-entry errors.
- Optimized React rendering for large datasets to improve page loading and interface responsiveness.
- Designed modular component architecture that improved code reuse and team productivity in an Agile environment.

### EDUCATION

**Perm National Research Polytechnic University**  
Master's Degree - Oil Field Development Technology 2018-2020  
Bachelor's Degree - Oil Production Facilities Operation and Maintenance 2014-2018
